HEY FOLKS! Does sliding around make you s

## How To

# Tighten Your Grip

**NOTHING CAN QUITE** beat genuine "A" grade Burmese rubber for sheer protection. Whenever you move at really high speed you risk overheating and bruising. You could even blow out! This is why a *fantastic* G-R-I-P is so important. It must be supple and elastic under all conditions, whether dry or moist. So remember, only **OUR** quality products promise you as much extra safety as you need, as well as valuable extra mileage!

So, protect yourself, and help put more **RUBBER** on the road!

## How To FEED A Dog

By Mildred Lindstrom

**Mildred Lindstrom, famous canine consultant of screen and stage recommends:**

1. That you keep your fridge stocked with your pet's favorite dishes. 2. That you install a medium-sized home nuclear generator to maintain your fridge operative in the event of a power failure. 3. Only you should feed your pet. Pets can easily be led astray by unwholesome vibrations. 4. If your dog should be surprised in the act of applying for an emigration visa to, say, New Yersey, keep calm and notify your nearest dogmatist... it's 99% certain that incorrect feeding is to blame. 5. Don't wag my tail, Don't wag my tail, I'll wag yours.

**PLEASE DON'T TRY TO  
CALL MILDRED!**

*Her enormous popularity means that there are far too many enquiries to answer by phone. Why not trying writing to her c/o your local dogmatist or takeaway sushi bar.*
